

Mincey

Mincey “Quick Grab” Cast Marble Adhesive

PRODUCT DATA SHEET OEM Industrial and Construction Product

Features:

- High Performance, Elastomeric Adhesive/Sealant • Fast Cure, Hybrid Formulation
- Resistant to Weathering and Degradation
- Fast Grab, High Green Strength

- Will Not Shrink or Crack
- Bonds to a Variety of Common Substrates
- Can be Applied on Vertical or Overhead Surfaces

Additional Benefits:

- Contains No Solvents or Isocyanates which makes Mincey CMA VOC Compliant
- Easy to Dispense and work with at a Variety of Temperatures
- Withstands a wide range of high heat and extreme cold
- Moisture Cure Adhesive

Description:

Mincey Quick Grab Cast Marble Adhesive is a one-part, moisture cure hybrid material. Mincey CMA has been formulated for use in both construction and industrial applications that require speed, strength and economy.

Mincey CMA excellent fixturing properties and requires minimal support while green strength develops.

Mincey CMA is a non-slump sealant and can be applied to vertical or overhead surfaces without flowing or sagging. Mincey CMA achieves over 50 psi or about 3000 lbs per linear foot of bond area.

Unlike many construction adhesives Mincey CMA contains no solvents and is made of 100% solids. Because of its rapid polymerization, Mincey CMA should be assembled within 15 minutes of applying the bead to prevent skinning over of the adhesive surface.

Common Applications:

Mincey CMA is an excellent sealant and/ or adhesive for many Commercial, Industrial, and Construction applications where a quick fixturing, strong bond is desired. Such applications include:

- OEM Applications (depending on substrates)
- Shower Panels and Instillation • Roof Framing in RV's
- Trailer Construction
- General Construction
- General Industrial Applications • Portable Housing Applications • Assembling Fiberglass Panels
- Roofing Construction
- Vertical Side Wall Applciations • Manufacturing and Assembly • Subfloor Applications
- Window and Door Installs
- Etc. (Can be used for various applications depending upon substrate)

Common Bonding Substrates:

Mincey CMA can be used on a variety of substrates that are not listed below. Please inquire or test on those substrates. We have listed some common substrates for your viewing:

- Aluminum
- Ceramics
- Painted Surfaces
- Glass
- Granite
- Marble
- Metals
- Most Woods
- EPS or Styrofoam Insulation
- Porcelain
- PVC
- Drywall
- Porous Surfaces (Concrete, Brick, Etc.)
- Etc. (substrates may vary depending upon application)
